

Patient Instructions

PA Form 6

## POST VASECTOMY SEMEN ANALYSIS

### SEMINAL FLUID COLLECTION:

1. Collect all of the seminal discharge in the sterile container provided. Do not use a condom.
2. If any portion of the discharge is lost, the specimen should be discarded.
3. Write full name and sponsor's social security number on the container's label.
4. Return container to the plastic bag provided.
5. Return to the laboratory within 1 hour of collection.

NOTE: Complete Semen Analysis (for Fertility Studies) is **NOT** performed at Andrew Rader USAHC. An appointment is required at either the Fort Belvoir Community Hospital (571-231-3971), or the Walter Reed National Naval Medical Center (301-295-0250) Laboratories.
